4. Conversion Factor Calculation
   a. Update to the standardized amount. L.C. 5307.1(g)(1)(A)(i) provides that the annual inflation adjustment for outpatient hospital facility fees shall be determined solely by the estimated increase in the hospital market basket. Thus, in lieu of using the Medicare 2019 rates to determine the updated OMFS amounts, the estimated increase in the hospital market basket was applied to the 2018 OMFS rate.

   b. OMFS conversion factor for hospital outpatient services
      1. The 2018 unadjusted conversion factor was $80.607. The estimated increase in the market basket is 2.9%. The revised unadjusted conversion factor under the OMFS is $82.945 ($80.607 x 1.029).

5. Wage Index and Adjusted Conversion Factors:
The Division made the following revisions:
   a. Section 9789.34 Table A sets forth the wage index values and adjusted conversion factors that are applicable to ASCs and non-listed hospitals. These conversion factors would be applicable to any hospitals that are not in Table B (section 9789.35).

   b. Section 9789.35 Table B sets forth hospital-specific wage index values and adjusted conversion factors for listed hospitals. Table B reflects the additional 7.1% payment adjustment for services rendered by rural sole community hospitals and EACHs.
