HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

ANALYSIS AND FINDING

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE: Provider dissatisfied with reimbursement of code 82486**
- The Provider billed CPT code 82486 x 40 units for date of service 10/10/2013. Provider's application submitted shows he was reimbursed \$138.28 and is seeking additional reimbursement of \$1053.08.
- Claims Administrator bundled the billed procedure code 82486 into HCPCS G0431 indicating the following on the Explanation of Review: "Reimbursement is based upon code G0431."
- Provider submitted laboratory results for the CPT code documenting qualitative test results for the following drug categories: Narcotics/Analgesics, Opiates, Oxycodone, Methadone, Benzodiazepines, Barbiturates, Amphetamines, Tricyclic Antidepressants, Antidepressants, Neuropathic and Sedatives/Hypnotics.
- Provider billed laboratory services on a CMS-1500 form with CPT 82486 x 40 along with ICD-9 V58.83 (Encounter for therapeutic drug monitoring).
- No documents have been submitted to support the necessity for CPT 82486 x 40. Only CMS-1500 form and two page lab results of the aforementioned chemicals can be taken into consideration during this review.

- The Provider conducted drug screening tests utilizing the Chromatography method. The HCPCS code G0431 can be used for Chromatography. The HCPCS code G0431 is reported with only one unit of service regardless of the number of drugs screened. The testing described by G0431 includes all CLIA high complexity urine drug screen testing as well as any less complex urine drug screen testing performed at the same patient encounter.
- HCPCS G0431: Drug screen qualitative; multiple drug classes by high complexity test method (e.g. immunoassay, enzyme assay), per patient encounter.

DETERMINATION OF ISSUE IN DISPUTE: Based on the documentation submitted, the code assignment and reimbursement of HCPCS G0431, the Claims Administrator was correct. No additional reimbursement is recommended for CPT 82486. There is no additional reimbursement warranted for the Official Medical Fee Schedule HCPCS code G0431.
