## HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

## ANALYSIS AND FINDING

**Based on review of the case file the following is noted:**

- **ISSUE IN DISPUTE: Provider seeking remuneration for 82486 x 38 units submitted for date of service 04/17/2014.**
- Pursuant to Labor Code section 5307.1(g)(2), the Administrative Director of the Division of Workers' Compensation orders that the pathology and clinical laboratory fee schedule portion of the Official Medical Fee Schedule (OMFS) contained in title 8, California Code of Regulations, section 9789.50, has been adjusted to conform to the changes to the Medicare payment system that were adopted by the Centers for Medicare & Medicaid Services (CMS) for calendar year 2013. Effective for services rendered on or after January 1, 2013, the maximum reasonable fees for pathology and laboratory services shall not exceed 120% of the applicable California fees set forth in the calendar year 2012 Clinical Laboratory Fee Schedule. Based on the adoption of the CMS payment system, CMS coding guidelines and fee schedule were referenced during the review of this Independent Bill Review (IBR) case.
- Claims Administrator denied 36 units of 89842 citing "medically unlikely edits" as the reason for denial.
- Provider submitted laboratory results for CPT 82486 documenting qualitative test results for the following drug categories: Narcotics/Analgesics, Opiates, Oxycodone, Methadone, Benzodiazepines, Barbiturates, Amphetamines, Tricyclic Antidepressants, Antidepressants, Neuropathic and Sedatives/Hypnotics and Validity Testing including; Creatinine, Nitrite, Glutaraldehyde, pH, S.G. & Oxidant/PCC.
