HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

ANALYSIS AND FINDING

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE:** Provider is dissatisfied with denial of 15736
- Claims Administrator denied code indicating on the Explanation of Review “The documentation does not support the level of service billed. Reimbursement was made for a code that is supported by the description and documentation submitted with the billing”
- Provider billed codes 15736 and 24343 on a CMS 1500 form.
- 15736 - Muscle, myocutaneous, or fasciocutaneous flap; upper extremity
- Provider’s Operative Report documents “The anconeus muscle was identified and removed off the ulna. It was elevated then the pedicle was retained. The pedicle was used as the basis. It was then rotated over to cover the defect over the lateral epicondyle. It was then sutured down with Fiber Wire suture.”
- Based on information reviewed, documentation does support billed code 15736.
- Reimbursement of 15736 is warranted.
- A 5% PPO discount is to be applied to reimbursement as well as a multiple procedure reimbursement.
