## HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

## ANALYSIS AND FINDING

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE: Provider seeking additional remuneration for G0453 performed on 12/02/2014.**
- Claims administrator reimbursed \$37.16 indicating on the Explanation of Review “The charge for the procedure exceeds the amount indicated in the fee schedule.”
- G0453 - Continuous intraoperative neurophysiology monitoring, from outside the operating room (remote or nearby), per patient, (attention directed exclusively to one patient) **each 15** minutes (list in addition to primary procedure).
- General CPT Instructions for timed codes indicate that a unit of time is attained when the mid-point is passed. Medicare recognizes this CPT guidance for many timed codes, including G0453. Therefore, physicians may bill for one unit of G0453 if at least 8 minutes of service is provided as long as no more than 4 units of G0453 are billed for each 60 minutes.
- Documentation submitted for review included the Intraoperative Monitoring Report, page 6, indicates “Total Professional Time: three hours 48 minutes,” equating to 4 hours x 4 units = 16 units.

The table below describes the pertinent claim line information.
