## HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

## ANALYSIS AND FINDING

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE: Provider seeking remuneration for New Patient Evaluation 99205-25 performed on date of service 09/18/2015.**
- The Claims Administrator down-coded 99205 to 99203 indicating “billed service does not meet the requirements of a consultation.”
- Contractual Agreement Not Submitted for IBR.
- The determination of an Evaluation and Management service for New Patients require **All three key components** in the following areas (AMA CPT 1995/1997):
  - 1) **History:** Chief Complaint, History of Present Illness, Review of Systems (Inventory of Body Systems), Past Family and Social History.
  - 2) **Examination:** “The 1995 documentation guidelines state that the medical record for a general multi-system examination should include findings about eight or more organ systems.”
  - 3) **Medical Decision Making Medical** decision making refers to the complexity of establishing a diagnosis and/or selecting a management option, which is determined by considering the following factors:
    - a. The number of possible diagnoses and/or the number of management options that must be considered;
    - b. The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be obtained, reviewed, and analyzed; and

- c. The risk of significant complications, morbidity, and/or mortality as well as comorbidities associated with the patient's presenting problem(s), the diagnostic procedure(s), and/or the possible management options.
- To determine the level of service in a given **component** of an E&M, the **data** must “**meet or exceed**” the elements required.
- 1995/1997 Evaluation and Management Levels/Elements (History / Exam / Medical Decision Making), Established Patient:
  - 99202: Exp. Problem Focused / Problem Focused / Straight Forward
  - 99203: Detailed / **Detailed Exam** / Low Complexity
  - 99204: **Comprehensive** / Comprehensive Exam / **Moderate Complexity**
  - 99205 **Comprehensive** / **Comprehensive Exam**/ **High Complexity**
- **Time:** In the case where counseling and/or coordination of care dominates (more than 50%) of the physician/patient and/or family encounter (face-to-face time in the office or other outpatient setting or floor/unit time in the hospital or nursing facility), time is considered the key or controlling factor to qualify for a particular level of E/M services. The total length of time of the encounter (faced-to-face) should be documented and the record should describe the counseling and/or activities to coordinate care.
- **Abstracted Initial Orthopedic Hand Surgery Specialist Consultation relating to date of service 09/18/2015** revealed the following service:
  - **History: Comprehensive**
  - **Exam: Comprehensive**
  - **Medical Decision Making: High Complexity**
  - New Patient E & M must **meet all three key components:**
    - **Comprehensive / Comprehensive / High = 99205**
- **Based on the aforementioned documentation and guidelines, additional reimbursement for 99205 services is warranted.**
- EOR received reflects a 10% PPO discount to be applied to reimbursement.

The table below describes the pertinent claim line information.
