- The Independent Bill Review Application
- The original billing itemization

- Supporting documents submitted with the request for second review
- The final explanation of the second review

HOW THE IBR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services Chief Coding Specialist reviewed the case file and researched pertinent coding and billing standards to reach a determination. In some cases a physician reviewer was employed to review the clinical aspects of the care to help make a determination. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services.

ANALYSIS AND FINDING

Based on review of the case file the following is noted:

- **ISSUE IN DISPUTE:** Provider seeking full remuneration for 99214 Evaluation and Management Services performed on 11/20/2015.
- Claims Administrator applied reimbursement relating to CPT 99213 with the following rationale: “reductions are in accordance with the medical fee schedule.”
- The determination of an Evaluation and Management service for Established Patients require **two** of **three** key components in the following areas (AMA CPT 1995):
 - 1) **History:** Chief Complaint, History of Present Illness, Review of Systems (Inventory of Body Systems), Past Family and Social History.
 - 2) **Examination:** “The 1995/1997 documentation guidelines state that the medical record for a general multi-system examination should include findings about eight or more organ systems.”
 - 3) **Medical Decision Making** Medical decision making refers to the complexity of establishing a diagnosis and/or selecting a management option, which is determined by considering the following factors:

-
- a. The number of possible diagnoses and/or the number of management options that must be considered;
 - b. The amount and/or complexity of medical records, diagnostic tests, and/or other information that must be obtained, reviewed, and analyzed; and
 - c. The risk of significant complications, morbidity, and/or mortality as well as comorbidities associated with the patient's presenting problem(s), the diagnostic procedure(s), and/or the possible management options.
- 1995/1997 Evaluation and Management Levels/Elements (History / Exam / Medical Decision Making), Established Patient:
 - 99212: Problem Focused / Problem Focused / Straight Forward
 - 99213: Expanded Problem Focused / Expanded Problem Focused / Low Complexity
 - 99214: Detailed History / Detailed Exam / Moderate Complexity – 25 min.
 - 99215 Comprehensive: extended HPI, ROS that is directly related to the problems identified in the HPI plus all additional body systems, and a complete PMFSH.
 - **Time:** In the case where counseling and/or coordination of care dominates (more than 50%) of the physician/patient and/or family encounter (face-to-face time in the office or other outpatient setting or floor/unit time in the hospital or nursing facility), time is considered the key or controlling factor to qualify for a particular level of E/M services. The total length of time of the encounter (faced-to-face) should be documented and **the record should describe the counseling and/or activities to coordinate care.**

Additional Evaluation and Management information can be found in the AMA CPT Code book or on-line at CMS.Gov.

- **Time Factor for date of service 11/20/2015:**
 - A Hand Written Progress note submitted from the Provider documents (numbers) “counselled” 1 – 4 topics of discussion resulting in “face-to-face counseling 50 min”
- Contractual Agreement not available for IBR.
- Based on the aforementioned documentation and guidelines, Evaluation and Management Service 99214 is warranted.
