### HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is Board Certified in Physical Medicine & Rehabilitation, has a subspecialty in Pain Medicine and is licensed to practice in California. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

### CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 67-year-old male who reported an injury on 04/10/1997. The mechanism of injury was not provided. On 07/31/2014, the injured worker presented with complaints of back pain. The diagnoses were chronic back pain, lumbar disc disease, facet joint syndrome, lumbar nerve root irritation L5-S1, and radiculitis in the left leg. Current medication included Norco, OxyContin, Flexeril, Celebrex, and Neurontin. Upon examination, there was a positive left sided straight leg raise. The provider recommended Norco and Oxycontin. The provider's rationale was not provided. The Request for Authorization form was not included in the medical documents for review.

### IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

**Norco 5/325 mg #60:** Upheld

**Claims Administrator guideline:** Decision based on MTUS Chronic Pain Treatment Guidelines Opioids, criteria for use.

**MAXIMUS guideline:** Decision based on MTUS Chronic Pain Treatment Guidelines Opioids, Criteria for use Page(s): 78.

**Decision rationale:** The request for Norco 5/325 mg with a quantity of 60 is not medically necessary. The California MTUS Guidelines recommend the use of opioids for the ongoing

management of chronic pain. The guidelines recommend ongoing review and documentation of pain relief, functional status, appropriate medication use, and side effects should be evident. There is a lack of evidence of an objective assessment of the injured worker's pain level, functional status, evaluation of risk for aberrant drug abuse behavior, and side effects. The efficacy of the prior use of the medication was not provided. Additionally, the provider does not indicate the frequency of the medication in the request as submitted. As such, medical necessity has not been established.

**Oxycontin 20 mg #90:** Upheld

**Claims Administrator guideline:** Decision based on MTUS Chronic Pain Treatment Guidelines Opioids, criteria for use.

**MAXIMUS guideline:** Decision based on MTUS Chronic Pain Treatment Guidelines Opioids, Criteria for use, Page(s): 78.

**Decision rationale:** The request for Oxycontin 20 mg #90 is not medically necessary. The California MTUS Guidelines recommend the use of opioids for the ongoing management of chronic pain. The guidelines recommend ongoing review and documentation of pain relief, functional status, appropriate medication use, and side effects should be evident. There is a lack of evidence of an objective assessment of the injured worker's pain level, functional status, evaluation of risk for aberrant drug abuse behavior, and side effects. The efficacy of the prior use of the medication was not provided. Additionally, the provider does not indicate the frequency of the medication in the request as submitted. As such, medical necessity has not been established.
