Date Assigned:	10/07/2014	Date of Injury:	04/25/2012
Decision Date:	12/03/2014	UR Denial Date:	09/23/2014
Priority:	Standard	Application Received:	10/02/2014

HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. The expert reviewer is Board Certified in Family Medicine and is licensed to practice in North Carolina. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/services. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The claimant had a date of injury of 4/25/2012. Diagnoses include mononeuritis of upper limb, lumbar degenerative disc disease, knee sprain and shoulder strain. Medications include NSAID, tramadol, sertraline and omeprazole. The request is for omeprazole 20 mg #60.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Omeprazole 20 mg #60: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Section 2 Page(s): 68.

Decision rationale: CA MTUS guidelines state that a proton pump inhibitor should be considered for administration with anti-inflammatory medication if there is a high risk for gastrointestinal events. In this case, the medical record does not document any history to indicate a moderate or high risk for gastrointestinal events. Therefore, the request is not medically necessary.
