HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California

Certification(s)/Specialty: Physical Medicine & Rehabilitation, Pain Management

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 46-year-old female, who sustained an industrial injury on 11/12/2012. She reported injury from heavy lifting. The injured worker was diagnosed as having lumbar radiculopathy, neuralgia. Electromyography (EMG) and nerve conduction study (NCS) were within normal limits. Treatment to date has included lumbar epidural steroid injection, physical therapy, back brace and medication management. In a progress note dated 3/20/2015, the injured worker complains of low and mid back pain, radiating to the left lower extremity. Physical examination showed lumbar tenderness. The treating physician is requesting Cyclobenzaprine 7.5 mg #60.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Cyclobenzaprine 7.5mg #60: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Cyclobenzaprine Page(s): 42.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines 8 C.C.R. 9792.20-9792.26 MTUS (Effective July 18, 2009) Page(s): 63-66 of 127.

Decision rationale: Regarding the request for cyclobenzaprine (Flexeril), Chronic Pain Medical Treatment Guidelines support the use of non-sedating muscle relaxants to be used with caution as a 2nd line option for the short-term treatment of acute exacerbations of pain. Guidelines go on to state that cyclobenzaprine specifically is recommended for a short course of therapy. Within the documentation available for review, it does not appear that this medication is being prescribed for the short-term treatment of an acute exacerbation, as recommended by guidelines. In the absence of such documentation, the currently requested cyclobenzaprine (Flexeril) is not medically necessary.
