HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California

Certification(s)/Specialty: Physical Medicine & Rehabilitation, Pain Management

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 62 year old male, who sustained an industrial injury on 10/18/2001. He reported injury from repetitive activities. The injured worker was diagnosed as having hypertension, intracranial hemorrhage, chronic myofascial pain syndrome and atrial fibrillation. There is no record of a recent diagnostic study. Treatment to date has included medication management. In a progress note dated 4/20/2015, the injured worker presented for a follow-up. Physical examination showed a stable blood pressure, clear breath sounds and irregular heart rhythm and a soft nontender abdomen. The treating physician is requesting one gym membership.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

One year gym membership: Upheld

Claims Administrator guideline: The Claims Administrator did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG), Lumbar & Thoracic (Acute & Chronic): Gym memberships (2015).

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Page(s): 46-47 of 127. Decision based on Non-MTUS Citation x Official Disability Guidelines (ODG), Low Back Chapter, Gym Memberships.

Decision rationale: Regarding request for gym membership, Chronic Pain Medical Treatment Guidelines state that exercise is recommended. They go on to state that there is no sufficient evidence to support the recommendation of any particular exercise regimen over any other exercise regimen. ODG states the gym memberships are not recommended as a medical prescription unless a documented home exercise program with periodic assessment and revision has not been effective and there is a need for equipment. Plus, treatment needs to be monitored and administered by medical professionals. With unsupervised programs there is no information flow back to the provider, so he or she can make changes in the prescription, and there may be a risk of further injury to the patient. Within the documentation available for review, there is no indication that the patient has failed a home exercise program with periodic assessment and revision. Additionally, there is no indication that the patient has been trained on the use of gym equipment, or that the physician is overseeing the gym exercise program. In the absence of such documentation, the currently requested gym membership is not medically necessary.
