HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: Arizona, California
 Certification(s)/Specialty: Family Practice

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 61 year old male, who sustained an industrial injury on August 8, 2007, incurring low back injuries. He was diagnosed with lumbar disc disease. Treatment included physical therapy, pain medications, anti-inflammatory drugs, injections, nerve branch blocks, Radiofrequency Ablation, and work restrictions. Currently, the injured worker complained continued low back pain extending into the tops of the right and left hips, restricted range of motion, tenderness and stiffness. The treatment plan that was requested for authorization included a prescription for Norco.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Norco 10/325mg, 90 tablets: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Opioids, criteria for use, On-going Management.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines opioids
 Page(s): 82-92.

Decision rationale: Norco is a short acting opioid used for breakthrough pain. According to the MTUS guidelines, it is not indicated as 1st line therapy for neuropathic pain, and chronic back pain. It is not indicated for mechanical or compressive etiologies. It is recommended for a trial basis for short-term use. Long Term-use has not been supported by any trials. In this case, the claimant had been on Norco along with Naprosyn for an unknown length of time. There was no mention of Tylenol failure. Pain score response to Norco was not noted in the recent visit. The use of Norco is not justified and not medically necessary.
