HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: New Jersey, Michigan, California
 Certification(s)/Specialty: Neurology, Neuromuscular Medicine

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a female, who sustained an industrial injury on 07/10/2007. On provider visit dated 12/15/2014, the injured worker has reported neck pain. On examination she was noted to have tenderness to palpation of bilateral paraspinals and upper trapezius as well as over bilateral scalene region and a decreased range of motion was noted as well. The diagnoses have included mild central stenosis of the cervical spine at multiple levels, bilateral thoracic outlet syndrome, status post bilateral first rib resection, ongoing neck and bilateral arm pain and chronic headaches. Treatment to date has included medication. Treatment plan included a trial prescription for Lidoderm 5% patch #60. On 01/02/2015 Utilization Review non-certified Lidoderm Patch. The CA MTUS, ACOEM, Chronic Pain Medical Treatment Guidelines were cited.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Lidoderm patch 5% #60: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Topical Analgesics.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Lidoderm (lidocaine patch) Page(s): 56.

Decision rationale: According to MTUS guidelines, "Lidoderm is the brand name for a lidocaine patch produced by Endo Pharmaceuticals. Topical lidocaine may be recommended for localized peripheral pain after there has been evidence of a trial of first-line therapy (tri-cyclic or SNRI anti-depressants or an AED such as gabapentin." In this case, there is no documentation that the patient developed neuropathic pain that did not respond to first line therapy and the need for Lidoderm patch is unclear. There is no documentation of efficacy of previous use of Lidoderm patch. Therefore, the prescription of Lidoderm patches #60 is not medically necessary.
