### HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California

Certification(s)/Specialty: Chiropractor, Oriental Medicine

### CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

Claimant is a 31 year old female who sustained a work related injury on 8/3/2011. Per a Pr-2 dated 1/13/2015, the claimant complains of pain in the right arm, wrist and hand. The pain is associated with numbness, tingling, and weakness in the right arm. She states that the symptoms have remain unchanged since the injury. Examination findings show positive Tinel's sign, Phalen's sign, decreased grip strength on the right and decreased sensation on the right median nerve distribution. Her diagnoses are wrist sprain, radial styloid tenosynovitis, reflex sympathetic dsystrophy of the upper limb, and carpal tunnel syndrome. She is permanent and stationary. The provider is recommending a trial of acupuncture. Four visits of acupuncture were approved on 12/23/2014.

### IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

**Acupuncture (8-sessions, 2 times a week for 4 weeks for the right wrist): Upheld**

**Claims Administrator guideline:** Decision based on MTUS Acupuncture Treatment Guidelines.

**MAXIMUS guideline:** Decision based on MTUS Acupuncture Treatment Guidelines.

**Decision rationale:** According to evidenced based guidelines, further acupuncture after an initial trial is medically necessary based on functional improvement. Functional improvement is defined as a clinically significant improvement in activities of daily living, a reduction in work restrictions, or a reduction of dependency on continued medical treatments or medications. The claimant has had prior acupuncture trial authorized. However, the provider fails to document objective functional improvement associated with the completion of the certified acupuncture trial. If this is a request for an initial trial, 8 visits exceeds the recommended guidelines for an initial trial.
