HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: Arizona, California

Certification(s)/Specialty: Family Practice

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 57 year old male, who sustained an industrial injury on January 6, 2012, incurring shoulder injuries after heavy lifting. He was diagnosed with rotator cuff syndrome. He underwent a total shoulder replacement surgery in September, 2015. Treatment included muscle relaxants and pain medications and work restrictions and modifications. Currently, the injured worker complained of right shoulder pain radiating down the arm and into the elbow. He rated his shoulder pain an 8/10 on a pain scale from 1 to 10 with activity. The treatment plan that was requested for authorization included a prescription for Norco.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Norco 10/325mg #60: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Opioids.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines opioids Page(s): 82-92.

Decision rationale: Norco is a short acting opioid used for breakthrough pain. According to the MTUS guidelines, it is not indicated as 1st line therapy for neuropathic pain, and chronic back pain. It is not indicated for mechanical or compressive etiologies. It is recommended for a trial basis for short-term use. Long Term-use has not been supported by any trials. In this case, the claimant had been on Norco for several months along with NSAID use. Long-term use is not recommended. Weaning attempt, Tylenol or Tricyclic failure was not noted. Continued and chronic use of Norco is not medically necessary.
