HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California

Certification(s)/Specialty: Physical Medicine & Rehabilitation, Pain Management

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 57 year old male who sustained an industrial injury on 4/10/14. The injured worker was diagnosed as having major depressive disorder, generalized anxiety disorder and psychological factors affecting medical condition. Currently, the injured worker was with complaints of having stress related difficulties at work as well as symptoms of depression and anxiety. Previous treatments included medication management. The plan of care was for Ambien 10 milligrams quantity of 30 with 2 refills.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Ambien 10mg #30 with 2 refills: Upheld

Claims Administrator guideline: The Claims Administrator did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines Pain, Insomnia Treatment, Zolpidem (Ambien).

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) Chronic Pain, Sleep Medication, Insomnia treatment.

Decision rationale: Regarding the request for zolpidem (Ambien), California MTUS guidelines are silent regarding the use of sedative hypnotic agents. ODG recommends the short-term use (usually two to six weeks) of pharmacological agents only after careful evaluation of potential causes of sleep disturbance. They go on to state the failure of sleep disturbances to resolve in 7 to 10 days, may indicate a psychiatric or medical illness. Within the documentation available for review, there is no current description of the patient's insomnia, no discussion regarding what behavioral treatments have been attempted, and no statement indicating how the patient has responded to Ambien treatment. Furthermore, there is no indication that Ambien is being used for short term use as recommended by guidelines. In the absence of such documentation, the currently requested zolpidem (Ambien) is not medically necessary.
