HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: California, Indiana, Oregon
 Certification(s)/Specialty: Orthopedic Surgery

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 56-year-old male who sustained an industrial injury on May 30, 2015 resulting in right shoulder and arm pain. Diagnoses based on MRI of June 20, 2015 show a full-thickness, retracted tear of the supraspinatus and infraspinatus; labral tear; glenohumeral articular damage of small loose bodies in the joint; and, complete tear of the biceps. Documented treatment includes ice, Diclofenac stated to reduce discomfort, and modified duty, as he is still working with restrictions. The injured worker continues to present with right shoulder pain and tenderness which is worse with flexion and extension. The treating physician's plan of care includes a request for a right shoulder scope rotator cuff possible labral; sub-acromial decompression and Mumford procedure; and, related pre-operative testing, and post-operative arm sling, hot-cold contrast unit, and 12 post-operative physical therapy sessions. This was denied on August 6, 2015 due to lack of documentation of failed adequate conservative treatment efforts.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

1 Right shoulder scope rotator cuff possible labral, sub-acromial decomp and Mumford procedure: Upheld

Claims Administrator guideline: Decision based on MTUS Shoulder Complaints 2004.

MAXIMUS guideline: Decision based on MTUS Shoulder Complaints 2004, Section(s): Surgical Considerations. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) Shoulder.

Decision rationale: According to the CA MTUS/ACOEM Shoulder Chapter, pages 209-210, surgical considerations for the shoulder include failure of four months of activity modification and existence of a surgical lesion. In addition the guidelines recommend surgery consideration for a clear clinical and imaging evidence of a lesion shown to benefit from surgical repair. The ODG Shoulder section, surgery for rotator cuff repair, recommends 3-6 months of conservative care with a painful arc on exam from 90-130 degrees and night pain. There also must be weak or absent abduction with tenderness and impingement signs on exam. Finally, there must be evidence of temporary relief from anesthetic pain injection and imaging evidence of deficit in rotator cuff. In this case, comprehensive non-surgical therapy including supervised therapy and injections was not documented. The request is not medically necessary.

Post-operative physical therapy 12 sessions: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: As the requested surgical procedure is not medically necessary, none of the associated services are medically necessary and appropriate.

Associated Service: 1 Arm sling: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: As the requested surgical procedure is not medically necessary, none of the associated services are medically necessary and appropriate.

Associated Service: 1 Hot/cold contrast unit: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: As the requested surgical procedure is not medically necessary, none of the associated services are medically necessary and appropriate.

Associated Service: 1 medical clearance: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: As the requested surgical procedure is not medically necessary, none of the associated services are medically necessary and appropriate.

Associated Service: CMC: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: As the requested surgical procedure is not medically necessary, none of the associated services are medically necessary and appropriate.

Associated Service: PT/PTT: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: As the requested surgical procedure is not medically necessary, none of the associated services are medically necessary and appropriate.

Associated Service: BMP: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: As the requested surgical procedure is not medically necessary, none of the associated services are medically necessary and appropriate.

Associated Service: EKG: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: As the requested surgical procedure is not medically necessary, none of the associated services are medically necessary and appropriate.
