### HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:

State(s) of Licensure: California

Certification(s)/Specialty: Preventive Medicine, Occupational Medicine

### CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

Patient is a 47 year-old male with date of injury 12/05/2008. The medical record associated with the request for authorization, a primary treating physician's progress report, lists subjective complaints as pain in the low back. Objective findings: Examination of the lumbar spine revealed tenderness to palpation of the left paravertebrals with spasm. Straight leg raise was negative in the seated position. Range of motion was reduced in all planes. Diagnosis: 1. Chronic pain syndrome, 2. other chronic post-operative pain. Patient has been taking Ambien for at least as far back as 6 months.

### IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

**Ambien CR 12.5mg #30:** Upheld

**Claims Administrator guideline:** The Claims Administrator did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines.

**MAXIMUS guideline:** The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines, Pain (Chronic), Zolpidem (Ambien).

**Decision rationale:** The Official Disability Guidelines do not recommend the use of sleeping pills for long-term use. While sleeping pills, so-called minor tranquilizers, and anti-anxiety agents are commonly prescribed in chronic pain, pain specialists rarely, if ever, recommend them for long-term use. They can be habit-forming, and they may impair function and memory more than opioid pain relievers. There is also concern that they may increase pain and depression over the long-term. The patient has been taking Ambien for longer than the 2-6 week period recommended by the ODG. Ambien CR 12.5mg #30 is not medically necessary.
