HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: Texas, Florida, California
 Certification(s)/Specialty: Preventive Medicine, Occupational Medicine

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The 59 year old male injured worker suffered an industrial injury on 12/31/2006. The diagnoses included chronic back pain, rupture of a muscle and thoracic back sprain. The injured worker had been treated with opioid medications. On 2/03/2015 and 3/9/2015, the treating provider reported continued significant pain in the back that is throbbing, shooting, and numbness rated as 10/10. He reported difficulty sleeping and depression. He utilized a cane for walking. The treatment plan included URINE DRUG SCREEN.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

URINE DRUG SCREEN: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines OPIOIDS.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines 8 C.C.R. 9792.20-9792.26 MTUS (Effective July 18, 2009) Page(s): 43 of 127.

Decision rationale: Although there are significant, pain issues noted in this claimant, drug issues or compliance issues are not. Regarding urine drug testing, the MTUS notes in the Chronic Pain

section: Recommended as an option, using a urine drug screen to assess for the use or the presence of illegal drugs. For more information, see Opioids, criteria for use: (2) Steps to Take before a Therapeutic Trial of Opioids & (4) On-Going Management; Opioids, differentiation: dependence & addiction; Opioids, screening for risk of addiction (tests); & Opioids, steps to avoid misuse/addiction. There is no mention of suspicion of drug abuse, inappropriate compliance, poor compliance, drug diversion or the like. There is no mention of possible adulteration attempts. The patient appears to be taking the medicine as directed, with no indication otherwise. It is not clear what drove the need for this drug test. The request is appropriately non-certified under MTUS criteria.
