HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: Pennsylvania, Ohio, California
 Certification(s)/Specialty: Physical Medicine & Rehabilitation

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 51 year old female, who sustained an industrial injury on February 8, 2013. The injured worker was diagnosed as having cervical sprain with radicular symptoms, lumbar radiculopathy, lumbosacral sprain with radicular symptoms and lumbar disc herniation. Treatment and diagnostic studies to date have included electromyogram, nerve conduction study, injections and medication. A progress note dated March 6, 2015 provides the injured worker complains of neck pain with radiation to left arm and low back pain radiating to left leg. Physical exam notes painful decreased range of motion (ROM). The plan includes lab work, medication and follow-up.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Norco 5/325 #180: Upheld

Claims Administrator guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Page(s): 91.

MAXIMUS guideline: Decision based on MTUS Chronic Pain Treatment Guidelines Opioids/Ongoing Management and Opioids for Chronic Pain Page(s): 78, 80.

Decision rationale: MTUS discusses in detail the 4 As of opioid management, emphasizing the importance of dose titration vs. functional improvement and documentation of objective, verifiable functional benefit to support an indication for ongoing opioid use. MTUS also discourages the use of chronic opioids for back pain due to probable lack of efficacy. The records in this case do not meet these 4As of opioid management and do not provide a rationale or diagnosis overall for which ongoing opioid use is supported. Therefore this request is not medically necessary.
