HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
State(s) of Licensure: California, Indiana, Oregon
Certification(s)/Specialty: Orthopedic Surgery

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 52 year old male who sustained an industrial injury on 03/26/14. Initial complaints and diagnoses are not available. Treatments to date include medications and right shoulder surgery. Diagnostic studies are not addressed. In a progress note dated 03/11/15, the treating provider reports the plan of care as physical therapy and a continuous passive motion machine. The requested treatments include a continuous passive motion machine for 14 days and a Vascutherm cold compression rental for 14 days.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

Vascutherm cold compression rental times 14 days with compression therapy wrap:
Upheld

Claims Administrator guideline: Decision based on MTUS ACOEM Chapter 12 Low Back Complaints. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG).

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) shoulder.

Decision rationale: CA MTUS/ACOEM is silent on the issue of shoulder cryotherapy. According to ODG Shoulder Chapter, Continuous flow cryotherapy, it is recommended immediately postoperatively for up to 7 days. In this case, the length of time requested postoperatively exceeds the recommendations. Therefore the determination is for not medically necessary.

Shoulder CPM times 14 days with sheepskin pad: Upheld

Claims Administrator guideline: The Claims Administrator did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG).

MAXIMUS guideline: The Expert Reviewer did not base their decision on the MTUS. Decision based on Non-MTUS Citation Official Disability Guidelines (ODG) shoulder.

Decision rationale: CA MTUS/ACOEM guidelines are silent on the issue of CPM machine. According to the Official Disability Guidelines, Shoulder Chapter, Continuous passive motion (CPM), CPM is recommended for patients with adhesive capsulitis but not with patients with rotator cuff pathology primarily. With regards to adhesive capsulitis it is recommended for 4 weeks. As there is no evidence preoperatively of adhesive capsulitis in the cited records, the determination is not medically necessary.
