HOW THE IMR FINAL DETERMINATION WAS MADE

MAXIMUS Federal Services sent the complete case file to an expert reviewer. He/she has no affiliation with the employer, employee, providers or the claims administrator. He/she has been in active clinical practice for more than five years and is currently working at least 24 hours a week in active practice. The expert reviewer was selected based on his/her clinical experience, education, background, and expertise in the same or similar specialties that evaluate and/or treat the medical condition and disputed items/Service. He/she is familiar with governing laws and regulations, including the strength of evidence hierarchy that applies to Independent Medical Review determinations.

The Expert Reviewer has the following credentials:
 State(s) of Licensure: New York
 Certification(s)/Specialty: Neurological Surgery

CLINICAL CASE SUMMARY

The expert reviewer developed the following clinical case summary based on a review of the case file, including all medical records:

The injured worker is a 38-year-old female who sustained an industrial injury on 10/16/01. Initial complaints and diagnoses are not available. Treatments to date include back surgery and medications. Diagnostic studies include x-rays. Current complaints include continued low back pain. Current diagnoses include post laminectomy syndrome. In a progress note dated 03/13/15, the treating provider reports the plan of care as revision of her back surgery. The requested treatments are a revision of L3-4 lateral fusion with associated services.

IMR ISSUES, DECISIONS AND RATIONALES

The Final Determination was based on decisions for the disputed items/services set forth below:

L3-L4 Lateral Interbody Fusion: Upheld

Claims Administrator guideline: Decision based on MTUS ACOEM Chapter 12 Low Back Complaints Page(s): 307. Decision based on Non-MTUS Citation Official Disability Guidelines - TWC Low Back Procedure Summary, Online Version, Spinal fusion, XLIF.

MAXIMUS guideline: Decision based on MTUS ACOEM Chapter 12 Low Back Complaints Page(s): 305-307.

Decision rationale: The California MTUS guidelines do recommend a spinal fusion for traumatic vertebral fracture, dislocation and instability. This patient has not had any of these events. The guidelines note that the efficacy of fusion in the absence of instability has not been proven. The California MTUS guidelines recommend surgery when the patient has had severe persistent, debilitating lower extremity complaints referable to a specific nerve root or spinal cord level corroborated by clear imaging, clinical examination and electrophysiological studies. Documentation does not provide this evidence. The guidelines note the patient would have failed a trial of conservative therapy. Documentation does not provide this evidence. The guidelines note the surgical repair proposed for the lesion must have evidence of efficacy both in the short and long term. Therefore, the request is not medically necessary and appropriate.

Inpatient Hospital Stay (2-days): Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated Surgical Service: Bone Growth Stimulator (purchase): Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated Surgical Service: Lumbar Brace: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated Surgical Service: H-Wave Unit: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Associated Surgical Service: VascuTherm Cold Therapy Unit (14-day rental): Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-Operative CBC with Differential: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-Operative PT, PTT: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-Operative UA: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Pre-Operative Exam with EKG: Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.

Post-Operative Physical Therapy (12-sessions, 2 times a week for 6 weeks): Upheld

Claims Administrator guideline: The Claims Administrator did not cite any medical evidence for its decision.

MAXIMUS guideline: The Expert Reviewer did not cite any medical evidence for its decision.

Decision rationale: Since the primary procedure is not medically necessary, none of the associated services are medically necessary.
