

TABLE 2 - PRESENT VALUE OF LIFE PENSION FOR A MALE

Use this table to commute, i.e. determine the present value (PV) of life pension benefits for a male. The "Age on DOC" column refers to the age of the injured employee as of the date of the commutation. The columns labeled "0, 1, 2, 3. . ." refer to the period of years between the DOC and the commencement of life pension, commonly referred to as the "deferral period". The number at the intersection of the row (representing age) and column (representing deferral period) contains the present value at \$1 per week for that combination of age and deferral period. Fractional ages and commencement delays can be accommodated using interpolation. See Examples D, E, and F under Commutation Procedures. This table is based on the U.S. Decennial Life Tables for 1989-91.

Age on DOC	Number of years between date of commutation (DOC) and commencement of life pension
